# Managed Web Service Plans (Lead Gen)

Services	Description
** Managed Backup	<i>Incremental backup daily, full backup weekly, 2 week retention on-site.</i>
*** Clustered Web Server	<i>Active-Active redundancy web server hypervisors. If one web server encounters hardware failure, the second web server hypervisor will take over while the failed server is taken offline for maintenance.</i>
+ Clustered Database Server	<i>Active-Passive redundancy database server hypervisor. If the active database server encounters hardware failure, the second database server hypervisor will be brought online to take over and the failed server will be taken offline for maintenance.</i>
++ Additional Services	<i>Includes any additional custom hardware or software installations not already included in our standard service plans.</i>
~ Full Shared vs. Light Shared	<i>In a full shared environment, computing and memory resources are shared among approximately 100-200 websites. In a light shared environment, resources are shared among approximately 20-30 websites.</i>
